1. Introduction & System Overview

Green Garden (GG) is a web-based cemetery and property management system built to help office staff manage clients, memorial lots, payment plans, bookings, and employees from a single, organized dashboard. It replaces paper records and spreadsheets with a structured, searchable, and auditable digital system.

What Green Garden Can Do

Module	Purpose
Client Records	Store personal information, government IDs, spouse details, and beneficiaries for every client.
Lot Plans	Assign memorial lot plans (standard lots, THS/THTC, or Columbarium) with pricing, discounts, and location details.
Payments	Automatically generate a monthly payment schedule per plan and record payments as they are made.
Bookings	Schedule viewing or interment appointments using an interactive calendar with time slots.
Employee Management	Create staff accounts, assign roles, and track login/logout activity.
Monitor	View a full history of who did what and when, plus on-demand and scheduled system backups.
Excel Exports	Download formatted spreadsheets of records, lots, bookings, and payment history.

Who is this guide for? This tutorial is written for front-line office staff and administrators who will use Green Garden day to day. No programming knowledge is required.

2. Getting Started — Logging In

Green Garden is accessed through a web browser. Your administrator will give you a **username**, a **password**, and a personal **4-digit PIN**.

Step-by-step: Logging in

1. Open the Green Garden web address in your browser.
2. Enter your **Username** and **Password**.
3. Optionally check **Remember Me** to stay signed in on that device.
4. Click **Login**.

Too many failed attempts? For security, the system temporarily blocks login attempts from a device after 5 failed tries within 10 minutes. Wait a few minutes and try again, or contact your administrator.

Your PIN

Your 4-digit PIN is separate from your password. It is required to confirm *sensitive actions* such as deleting a client, deleting an employee, cancelling a plan or booking, or processing a payment. Keep your PIN private — anyone with your PIN can confirm actions under your account.

Logging Out

Click the **Logout** button in the top-right corner of any page. For your security, you will also be automatically logged out after **8 hours** of inactivity, or when you close your browser, whichever happens first.

3. Roles & Permissions

Every employee account is assigned one role. Roles determine which actions you are allowed to perform. Administrators can do everything.

Role	Can View	Can Add / Edit	Can Manage Payments & Plans	Can Manage Employees
Admin	Everything	Everything	Yes	Yes
General Staff	Everything	Clients, beneficiaries, bookings	View payment history only	No
Financial Staff	Everything	Cannot add/edit client records	Yes — assign plans, process & cancel payments	No

What happens if I try a restricted action? A pop-up titled "Access Restricted" will explain that you don't have permission, and who to contact. Your attempt is not performed and nothing is saved.

4. The Dashboard

The Dashboard is the first page you see after logging in. It gives a quick snapshot of the entire cemetery operation.

Overview Cards

Card	Meaning
Total Clients	Number of client records in the system.
Active Plans	Lot plans currently being paid off (not cancelled, not completed).
Inactive (No Plan)	Clients registered but not yet assigned a lot plan.
Completed Plans	Plans that have been fully paid.
Pending Payments	Number of monthly payments still unpaid across all active plans.
Total Collected	Sum of all payments ever received.

Recent Payments & Recent Activity

Two side-by-side lists show the latest payments processed (with amount, month, and the staff member who processed them) and the latest actions taken across the system (logins, record edits, cancellations, etc.). This gives you an at-a-glance audit trail without opening the full Monitor page.

5. Client Records

The **Client Records** page (sidebar: *Client Records*) lists every registered client with their contact details, civil status, current plan, and status.

5.1 Adding a New Client

Step-by-step

1. Click + **Add New Client** (visible to General Staff and Admin).
2. Fill in **Personal Information**: name, address, contact number, civil status, date of birth, religion, occupation, and employer details.
3. If Civil Status is **Married**, **Widowed**, or **Separated**, the **Spouse Information** section appears automatically — fill in what applies.
4. Fill in the **Government Issued ID** section (type, number, date issued, place issued).
5. Add one or more **Beneficiaries** using + **Add Beneficiary**; remove any with **Remove**.
6. Click **Save Client**.

Duplicate protection: the system will not allow two clients with the exact same first name, last name, and date of birth — this prevents accidental double registration.

5.2 Searching & Viewing Clients

Use the search box above the table to filter by name, contact number, civil status, or plan name. Click **View** on any row to open the full **Client Profile**, which shows personal information, spouse information, government ID, beneficiaries, and every lot plan ever assigned to that client (current and past).

5.3 Editing a Client

From Client Records or the Client Profile, click **Edit** (General Staff / Admin only). You can update personal details and manage beneficiaries — tick a beneficiary's **Delete** checkbox to remove them, or add new ones, then click **Update Client**.

5.4 Deleting a Client

This cannot be undone. Deleting a client also permanently deletes their beneficiaries, lot plans, and payment history.

1. Click the red **Delete** button on the client's row.
2. Confirm the client's name in the pop-up.
3. Enter your 4-digit PIN and click **Delete Client**.

6. Lot Plans & Lot Records

6.1 Lot Type Groups

Green Garden organizes memorial lots into three groups, each with its own location fields:

Group	Lot Types	Location Fields
Standard	Lawn lot, Garden lot, Junior court, Executive court, Senior court, Family estate, Grand estate	Phase, Block, Section, Lot Number
THS / THTC	THS, THTC	Phase, Block, Section, Column Level
Columbarium	Columbarium	TCT A/R Type, Level (1-4), Tomb Number

When you select a lot type on the Plan page or filter on the Lots page, the form automatically shows only the relevant fields for that group and clears/disables the rest.

6.2 Assigning a Plan to a Client

Step-by-step (Financial Staff / Admin)

1. Open the client's profile and click **Plan** (or go to Client Records → Plan).
2. Choose the **Lot Type**, **Monthly Payment**, and **Duration** (6 / 12 / 24 / 36 / 60 months).
3. Optionally enter a **Down Payment** and a **Discount %** — the *Effective Down Payment* preview updates automatically.
4. Fill in the location fields that appear for the chosen lot type group.
5. Optionally enter a **Contract Number**, **Interment Date**, and **P.A. Date**.
6. Click **Save Plan**.

A client can only have **one active plan at a time**. If they already have one, you must cancel or complete it before assigning a new plan. Cancelled or completed plans remain visible in the Plan History table and do not block new assignments.

6.3 Cancelling a Plan

In the Plan History table, click **Cancel** next to an active plan, optionally type a reason, enter your PIN, and confirm. A cancelled plan is marked with a red *Cancelled* badge and keeps its cancellation reason and date on record.

6.4 The Lots Page

The **Lots** page lists every lot ever assigned, across all clients. Use the filter bar to search by Lot Type, Phase/Block/Section/Lot Number (standard), Column Level (THS/THTC), or Columbarium Type/Level/Tomb Number — the visible filters adapt automatically to your selected Lot Type. You can also filter by Status (Active, Completed, Cancelled).

7. Payments & Payment History

7.1 How the Monthly Schedule Works

As soon as a plan is assigned, the system automatically generates one payment row per month for the full duration of the plan (for example, a 24-month plan creates 24 monthly rows), starting from the plan's start date.

7.2 Viewing the Payment Summary

From Client Records, click **Payment** on a client's row to see a summary card for each of their plans — monthly amount, duration, total paid, and remaining balance.

7.3 Recording a Payment

Step-by-step (Financial Staff / Admin)

1. Click **View & Pay** on a plan card to open its full monthly schedule.
2. Find the desired month and click **Pay Now**.
3. Confirm the month and amount in the pop-up.
4. Enter your 4-digit PIN and click **Confirm Payment**.

Once confirmed, the row turns green, shows the exact date and time paid, and the plan's *Total Paid*, *Remaining Balance*, and *Months Remaining* update instantly. When the final month is paid, the plan's status automatically changes to **Completed** and a *Date Fully Paid* is recorded.

General Staff can open the same page in **read-only mode** to check payment status for clients, but cannot click Pay Now.

7.4 Multiple Plans per Client

If a client has more than one plan on record (e.g., a completed plan plus a new active one), a row of plan tabs appears so you can switch between each plan's payment history.

8. Bookings & the Calendar

8.1 Creating a Booking

Open **Bookings** from the sidebar. The page shows a mini-calendar, a time-slot picker, and a booking form, side by side.

Step-by-step

1. Click an available date on the mini-calendar (green = open, yellow = partially booked, red = fully booked).
2. Pick an open time slot — the day runs from **7:00 AM to 5:00 PM** in 1-hour slots.
3. Enter the visiting **Client Name** and **Contact Number**.
4. Choose the **Event Type**: Viewing or Interment.
5. Add optional **Notes** (e.g., special instructions).
6. Click **Save Booking**.

A specific date and time slot can only be booked once. Past time slots on the current day are automatically greyed out and cannot be selected.

8.2 The Full Calendar View

Click **Full Calendar** to see a month-at-a-glance view. Click any date to see its full list of time slots and their status. Days already containing a recorded **Interment Date** from a client's lot plan are marked with a purple = **Interment** label — this is purely informational and does not block bookings on that day.

8.3 Cancelling or Marking "No Show"

On the bookings table, an active booking can be:

- **Cancelled** — the slot becomes available again for other bookings.
- **Marked as No Show** — recorded for the same date/time, with an optional reason.

Both actions require typing a reason (optional) and entering your PIN to confirm.

8.4 Automatic Completion

Once a booking's date has passed, it is automatically marked **Completed** the next time the Bookings page is loaded — no manual action needed.

9. Employee Management

This module is visible to Administrators only.

9.1 Adding an Employee

Step-by-step

1. Go to **Employee** → **+ Add Employee**.
2. Set up their **Account Credentials**: username, password (confirmed twice), and a 4-digit **PIN** used to confirm sensitive actions.
3. Fill in **Personal Information** (name, date of birth, address, phone, email).
4. Fill in an **Emergency Contact** name and number.
5. Choose their **Role** — General Staff or Financial Staff — and enter their **Government ID**.
6. Click **Save Employee**.

The username `admin` is reserved for the system administrator and cannot be used for a regular employee account.

9.2 Viewing & Editing an Employee

Click **View** on the Employee list to see account info, personal details, emergency contact, and their latest login/logout session. Click **Edit Employee** to update any field, change their role, reset their PIN, or set a new password (leave the password field blank to keep the current one).

9.3 Deleting an Employee

Deleting an employee also deletes their login account and history. This cannot be undone, and you cannot delete your own account.

Click **Delete** on their row, confirm their name, enter your PIN, and confirm.

10. Monitor — Activity Logs & Backups

This module is visible to Administrators only.

10.1 System Backup Panel

At the top of the Monitor page you'll find the backup control panel, showing:

- The **last backup time** and file name.
- A **Backup Now** button to trigger an immediate, full backup.
- A scrollable list of the most recent backup files stored on the server.

Each backup is a single ZIP file containing CSV exports of clients, beneficiaries, plans, payments, bookings, employees, and activity logs — plus a full copy of the database. A copy is saved locally on the server, and (if configured) automatically emailed as well, so a recovery copy exists even if the server itself is unavailable.

Automatic backups also happen any time important data changes (a client is added, a payment is recorded, a plan is cancelled, etc., subject to a short cooldown period to avoid excessive backups), and once every day automatically at a scheduled time — no manual action required for normal operation.

10.2 Activity Logs & Filters

Below the backup panel, every recorded action in the system appears in a searchable table: staff name, role, action type (Login, Add Client, Cancel Plan, Add Payment, etc.), a short detail, and the exact date and time. Use the filter form to narrow results by employee name, action type, or a date range, then click **Filter** (or **Reset** to clear).

11. System Settings

This module is visible to Administrators only.

System Settings lets an administrator securely update sensitive configuration values — the email account used to send backup copies, and the system-wide Admin PIN. Every value you see and save here is **encrypted before being stored**, and is never shown back to you in plain text.

Updating a setting

1. Fill in only the field(s) you want to change — leave the rest blank to keep their current values.
2. Enter the **current Admin PIN** at the bottom of the form to confirm the change.
3. Click **Save & Encrypt**.

If you change the Admin PIN here, remember the new PIN immediately — it is required for every PIN-protected action across the system, including by the admin account itself.

12. Exporting Data to Excel

Several pages include a  **Export Excel** button that downloads a formatted, color-coded spreadsheet (`.xlsx`) you can open in Excel or Google Sheets.

Page	What gets exported
Client Records	All client information plus their current plan and status.
Lots	Every lot ever assigned, with phase/block/section, buyer, dates, and status.
Bookings	The complete bookings table including cancelled and completed entries.
Payment History	Client and plan details plus the full monthly schedule for one plan.

Each export includes a title, the export date, a styled dark header row, and automatically sized columns for easy reading.

13. Security Notes & PIN Usage

13.1 Actions That Require a PIN

Action	Who can perform it
Delete a client	General Staff, Admin
Delete an employee	Admin
Cancel a lot plan	Financial Staff, Admin
Process a monthly payment	Financial Staff, Admin
Cancel a booking / mark No Show	General Staff, Admin
Update System Settings	Admin

13.2 Good Practices

- Never share your username/password or PIN with another employee.
- Log out when stepping away from a shared computer.
- Report any unfamiliar activity you notice in the Monitor log to your administrator.
- If you suspect your PIN has been compromised, ask an administrator to reset it immediately via Edit Employee.

14. Troubleshooting & FAQ

Q: I clicked a button and nothing happened, or I see a lock icon pop-up.

A: This means the action is restricted to a different role than yours. The pop-up message tells you exactly which role is required — ask an administrator or the relevant staff member for help.

Q: Why can't I find a client I just added?

A: Make sure your search box is empty, or that your search term matches the client's name, contact number, or plan exactly as typed. Clearing the search field shows the full list.

Q: A booking time slot I want is greyed out even though no one booked it.

A: If the date is today, time slots earlier than the current time are automatically disabled and cannot be booked.

Q: I assigned the wrong plan to a client. What do I do?

A: Cancel the incorrect plan (with a reason describing the mistake), then assign the correct plan. The old plan remains visible in Plan History for record-keeping.

Q: How do I know if today's backup already ran?

A: Check the **Last Backup** time shown at the top of the Monitor page — it updates automatically after every backup, whether triggered manually or by the daily schedule.

Q: I keep getting locked out of login.

A: After 5 failed login attempts within 10 minutes, the system blocks further attempts for about 15 minutes as a security measure. Double check your username and password, or wait and try again.

For any issue not covered in this guide, please contact your system administrator.
